

The advent of a broadcast flag is an attempt by the media companies to extend there monopolistic behavior and extort from the public and deny them there fair use rights. It allows the media companies to dictate American lifestyle by controlling when a person may view content.

The FCC should not be a tool for the Media companies or bow to their buffs.

I have purchased over \$12000 dollars of HDTV equipment which I now find may be obsolete.

Thanks,

Stephen Sturges
